³ *Royal Observatory of Belgium*

We present the incorporated recently in the Wide-Field Plate Database (WFPDB) catalogue of the Royal Observatory of Belgium (ROB) Carte du Ciel plates. The catalogue comprises the descriptive information about 660 plates obtained in the frames of the Carte du Ciel project in the period 1908 - 1939 with the Equatorial Gautier 0.33m telescope. The analysis of the catalogue is present. The catalogue, as well as plate previews, taken with 250 dpi resolution, are available online at <http://www.skyarchive.org/>.
